KIGALI INDEPENDENT UNIVERSITY (ULK)

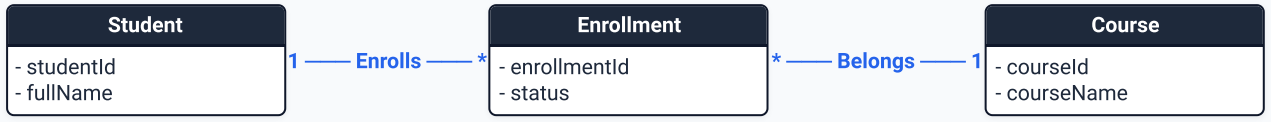

Report 2: UML Class Diagram Report

System Architecture & Class Structure

1. Class Specifications

Class Name	Attributes	Methods (Operations)
Student	- studentId: String - fullName: String - email: String	+ register() + updateProfile() + viewCourses()
Teacher	- teacherId: String - fullName: String - specialization: String	+ assignCourse() + viewStudents()
Course	- courseId: String - courseName: String - credits: int	+ getDetails() + updateCredits()
Enrollment	- enrollmentId: String - enrollmentDate: Date - status: String	+ confirmEnrollment() + cancelEnrollment()

2. Structural Diagram Preview

3. Class Relationships & Multiplicities

1. Student to Enrollment (1 : *)
One student can have multiple enrollment records over time, but each enrollment record belongs to exactly one student.

2. Course to Enrollment (1 : *)
One course can be associated with many enrollment records, but each enrollment entry pertains to a single course.

3. Teacher to Course (1 : *)
A teacher can be assigned to teach one or many courses, while each course is instructed by one primary teacher.
